

FLYWIRE

Integrated global payment system to support student and international payments from outside South African borders.

Working in partnership with Flywire, we deliver a fully integrated payment solution to learning institutions looking to facilitate cross-border payments and ensure effortless international payment options for students and their families. Helping to position Africa, and our institutions of higher learning, as an academic destination of choice.

With Flywire's payment gateway embedded directly into Adapt IT's ITS Integrator student management system, students can pay for their education in the country and currency of their choice, enjoy low exchange rates, and track payments online. At the same time, institutions can integrate the system with their financial management solution – in real time.

ADAPT IT & FLYWIRE

- » Adapt IT and Flywire partnered in 2022 to create a digital cross-border payment system for international students studying in Africa.
- » Flywire is seamlessly embedded directly into Adapt IT's ITS Integrator, South Africa's preferred ERP learning management system.

OUR FOOTPRINT

- » We currently deliver a fully integrated Flywire solution to the Central University of Technology and the University of Kwazulu-Natal.

THE CREDIBLE DIFFERENCE

Payment Tracking

Automatically capture relevant student information and ensure payments received in real-time are accurate and linked to financial information captured within your learning management system.

Automated Reconciliation

Using unique batch delivery technology, all foreign payments are posted instantly to appropriate student records on receipt of funds. Improving the accuracy of allocations and making payments 100% traceable.

Balancing Payments

With a comprehensive receivables solution, seamlessly receive and reconcile payments from anyone, anywhere in the world, at any time.

Payment Partners

With integration into a network of leading global payment partners, students can avoid high foreign transfer fees and review their balance before releasing payment.

Fraud Protection

Students can use the system with confidence that their data remains safe and anonymous. Flywire undergoes an annual SOC II and PCI DSS review - handling customer data securely in compliance with all applicable laws. Further, Adapt IT ensures the security of all data with a layer of 3D security.

Support

With the backing of a local skills base and support team through Adapt IT, coupled with the global 24/7 multilingual support and service via chat, phone, and email from Flywire - you can rest assured that your system is always on. Always up. And payments are constantly being processed.

OUR DIFFERENCE

- » The partnership between Adapt IT and Flywire provides learning institutions with a seamless digital payment experience.
- » Ask us how we can help you better serve international students with a frictionless payment offering integrated directly with your learning management system.

CUSTOMER REVIEW

"Our e-Payment Portal allows international students to make foreign payments in their native currencies with great simplicity and ease. Other advantages include timely payments, seamless operation for the university, affordable rates, and cost-effectiveness for the students."

Ms Sandy Heera (Director: Financial Reporting)
University of Kwazulu-Natal

"With our payments platform, we give our international students an easy means to make payments in their own currency and let them indicate the amount to be paid in Rands. Once they have paid their student account is updated immediately and automatically. This gives them visibility into amounts owing and enables us a seamless means to receive, track, and allocate funds from our international students."

Ms Joanie Mong (Financial Reporting Manager)
Central University of Technology - Free State

ABOUT ADAPT IT - EDUCATION

Adapt IT provides cloud-ready and cost effective solutions for the sound management of tertiary institutions. Through a web-based, mobile friendly, innovative student application and registration solution, management is able to monitor student intake numbers and related funding. Institutions are able to optimise infrastructure resources and increase student intake, through integrating face to face as well as distance learning. Finance and HR/Payroll modules assist management to drive institutional and individual performance and compliance by enabling detailed budgeting and reporting. Providing a responsive solution that services over 2 million students in public and private institutions, Adapt IT Education has a tried and tested System Development Life Cycle SDLC approach to projects. Our international footprint includes: Europe, Ireland, Botswana, Mauritius and Kenya. Through our acquisition of ICAS and Wisenet, we have extended Adapt IT's capability to the Private Higher Education sector and, leveraging over 33 years of unparalleled Education experience, we are more than capable of partnering with any institution, irrespective of size.

Adapt IT Education now provides scalable solutions that support our customers through their various phases of growth, from a few hundred to tens of thousands of students. We currently have approximately one thousand customers, supporting over two million worldwide.
