

HIGHER DEGREE MANAGEMENT SYSTEM (HDMS)

A digital platform to streamline and simplify the functions of all role players in a Higher Degrees Management ecosystem.

With a digital Higher Degrees Management System (HDMS), Adapt IT delivers a powerful tool for learning institutions to manage the role of students, supervisors, schools, colleges, universities, and examiners when processing the demands of higher degree students. The system provides seamless, organised, and efficient engagement from the application approval phase right through to the examination phase.

Directly integrated with our **Education Enterprise Student, Finance and HR/Payroll ERP** management system, a user can attach documents, perform submissions online, and review the status of submissions, comments, and applications online. Alerts and notifications can now also all be delivered online.

AS A SOLUTION

- » The HDMS system is fully, securely, and seamlessly integrated with ITS Integrator.
- » With HDMS, a learning institution can streamline all higher degree administrative processes from application approval to the graduation phase, identifying and alleviating bottlenecks.
- » Coordinates communication and collaboration between online submissions and reviewing of information from users.

OUR FOOTPRINT

- » HDMS is currently being used by the University of Zululand in KwaZulu-Natal, South Africa.

BENEFITS

Streamline Administrative Processes

System users can make online submissions, receive notifications, and monitor the status of requests.

Optimise Workflow

Enhances inefficient and time-consuming procedures that may result in bottlenecks, which would traditionally and potentially obstruct progress and result in missed deadlines.

Automated Student Management

Student information and progress can be monitored online. And reminders and updates can be sent directly via the system.

Effective Staff Supervision

Integrating with an enterprise resource planning program (ERP), enables visibility of employee activities, workload, and deadlines, fostering and enhancing cross-departmental collaboration.

KEY FEATURES

- » Employee Creation
- » Suspensions
- » Supervisor Maintenance
- » Application Approvals
- » Examiner Maintenance
- » Supervisor Reports
- » Progress Reports
- » Dissertation Submission and Assessment

CUSTOMER REVIEW

"This module allows the University to efficiently manage the complicated Process of Post Graduate Applications. It creates the opportunity for the University to achieve its enrolment targets easily with this digitalised software."

Mr Patrick Zungu, Manager: Business Process & ERP, University of Zululand

ABOUT ADAPT IT - EDUCATION

Adapt IT provides cloud-ready and cost effective solutions for the sound management of tertiary institutions. Through a web-based, mobile friendly, innovative student application and registration solution, management is able to monitor student intake numbers and related funding. Institutions are able to optimise infrastructure resources and increase student intake, through integrating face to face as well as distance learning. Finance and HR/Payroll modules assist management to drive institutional and individual performance and compliance by enabling detailed budgeting and reporting. Providing a responsive solution that services over 2 million students in public and private institutions, Adapt IT Education has a tried and tested System Development Life Cycle SDLC approach to projects. Our international footprint includes: Europe, Ireland, Botswana, Mauritius and Kenya. Through our acquisition of ICAS and Wisenet, we have extended Adapt IT's capability to the Private Higher Education sector and, leveraging over 33 years of unparalleled Education experience, we are more than capable of partnering with any institution, irrespective of size.

Adapt IT Education now provides scalable solutions that support our customers through their various phases of growth, from a few hundred to tens of thousands of students. We currently have approximately one thousand customers, supporting over two million worldwide.
