HOST TO HOST

Direct host-to-host payments between parties for the automatic transfer of funds between parties without the use of intermediaries.

Drawing from the power of a Host-to-Host (H2H) payment protocol, we provide learning institutions direct payment processing integrated with our Education Enterprise Student, Finance and HR/Payroll ERP management system, ITS Integrator. An automated solution for secure electronic data transfer between banks and an institution, H2H strips out the middleman and supports the seamless exchange of information, regardless of the file format, network protocol, or preferred security standards a client uses.

H2H allows a learning institution to digitally transform the management of its finances in an era of financial globalisation. When implemented, a bank and institution can automate payments without manual intervention.

Achieve more.

ITS INTEGRATOR AND H2H

» H2H payments leverage the world's largest and most widely used payment messaging network, SWIFT, which is seamlessly integrated with ITS Integrator to provide efficient and secure payments and payroll processing.

» With H2H, Adapt IT education clients can submit payments securely, directly from their Enterprise Resource Planning (ERP) Systems automatically without any manual intervention.

OUR FOOTPRINT

» The H2H solution is currently used by nine universities in South Africa:

- Nelson Mandela University (NMU)
- University of Johannesburg (UJ)
- Durban University of Technology (DUT)
- University of KwaZulu-Natal (UKZN)
- Walter Sisulu University (WSU)
- Tshwane University of Technology (TUT)
- Central University of Technology (CUT)
- Sefako Makgatho Health Sciences University (SMU)
- University of Zululand (UNIZULU)

THE CREDIBLE DIFFERENCE

Streamlined Payment Process
Negate the need to set up a separate system or account with a third-party provider, as payments leverage the already-existing infrastructure of banking systems to facilitate transactions.

Efficient Payment with System Integration
Host-to-host payments are instant, meaning there is no need to wait for funds to clear, and deposits are instantly credited to an account. In the case of student deposits, registration is more efficient as a student can examine their academic results or move on to the next step of registration immediately after completing a payment.

Security and Compliance

H2H is safer than many alternative payment processing techniques. The payment file travels across a dedicated secure channel (SWIFT) between the customer and the bank. The data relating to each transaction is managed and housed securely by a bank instead of a website or database. This secure transfer reduces the possibility of important information and personal data being stolen or compromised by human error or intervention, safeguarding both payor and payee.
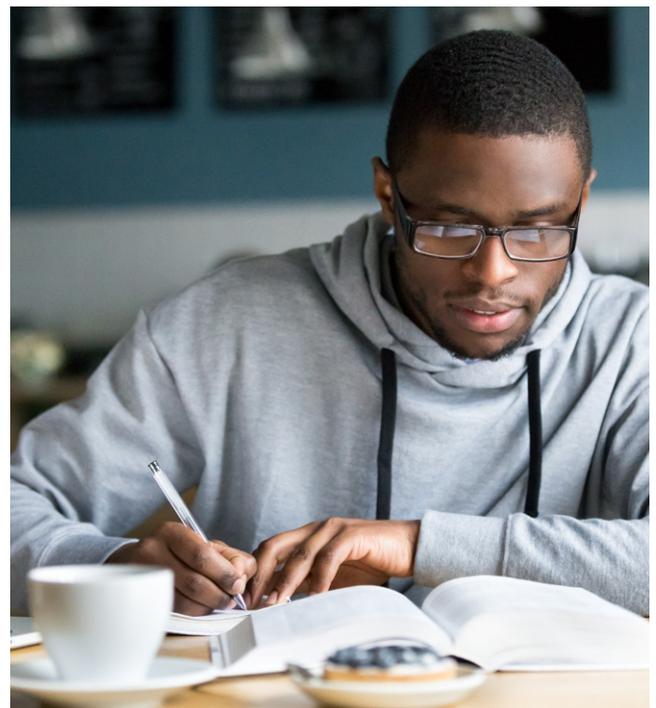

CUSTOMER REVIEW

"This system is audit compliant, it is effective and efficient, lessening our manual reconciliations considerably. It has reduced our operational risk of transferring the funds seamlessly and ruling out file tampering."

Dr V van Graan (Deputy Director: Accounts Payable)
Tshwane University of Technology

ABOUT ADAPT IT - EDUCATION

With over 33 years of experience in the education sector, our Adapt IT Education division provides a cloud-ready and cost-effective portfolio of fully integrated Education, Enterprise Student, Finance and HR/Payroll (ERP) Management Systems to institutions of higher learning around the world.

Our highly scalable web-based, mobile-friendly, innovative student application and registration platforms allow tertiary institutions better to manage applications, student funding, and accounts. Using the Adapt IT learning solutions, our customers can optimise their IT infrastructure and create a single view of the institution from students to lecturers, payroll, finance, HR, and learning modules.

Our strength lies in our ability to drive institutional and individual performance in a secure, easy-to-use, cost-effective, and compliant manner. Today we service over 2 million students in more than 1000 public and private institutions in South Africa, Ireland, Botswana, Mauritius and Kenya, no matter the organisation's size, or the number of students it serves.
